Course On IOT Learning REST APIs

Ajay Vigneshwar GB

Software Developer at Lithia Motors Inc

Toronto, Ontario, Canada

Summary

- Strong experience in Core Java and J2EE Web applications,
 Enterprise applications, Client/Server applications using Java, J2EE,
 Web Services, JDBC, Servlets, JSP, JSF, XML, SQL, Hibernate,
 Spring Boot and JavaScript.
- Experience in Analysis, Design, Development, Integration,
 Deployment and Maintenance of Web services, Enterprise
 Applications, Distributed Applications, Client Server and Web based applications.
- Working knowledge of developing and implementing Microservices and Web Services using REST.
- Expertise in Unit testing, Integration testing during development and supporting system testing prior to deployment.
- Experience in designing and implementing server side web applications and APIs using Node.js.
- Experience with Git, GitHub, Bitbucket and various IDEs like Eclipse, IntelliJ, Spring Tool Suite.
- Good knowledge of features like Lambda Expressions, Method References, Streams, Annotations.
- Sound knowledge of Spring IOC, Dependency Injection and Aspect Oriented Programming (AOP).
- Good expertise in development, deployment, troubleshooting, debugging and code refactoring.
- Strong experience with Defect Management tools like JIRA and Build Automation tools like Maven.
- Good experience in both Waterfall and Agile Scrum Methodologies for development and testing.
- Excellent communication, interpersonal, analytical skills and an ability to prioritize to meet deadlines.
- Highly adaptable, committed, flexible and a team player with strong work ethic and a positive attitude.

Experience

Lithia Motors, Inc. Software Developer April 2022 - Present (1 year 1 month)

Toronto, Ontario, Canada

Pfaff Automotive Partners
Software Developer
February 2021 - April 2022 (1 year 3 months)
Toronto, Ontario, Canada

Backend development using FastApi and Python | Azure Serverless Arch | Azure Functions using python | ui path RPA bot development | Angular 12 single page application | SSIS

Insyght.AI
Full Stack Engineer
May 2019 - January 2021 (1 year 9 months)
Oakville, Ontario, Canada

- Worked on Front and Back-end web development and design.
- Created custom solutions using Node.js, Java and responsive web development technologies.
- Used Git for version control, Jira for tracking work in this agile workplace.
- Integration of user-facing elements developed by front-end developers with server side logic.
- Provided ongoing support for company web site applications including programming support for enhancing web applications and technical support to members with web site application issues.
- Creating Restful API and creating a swagger based documentation for API.
- Provided workflow to improve code quality through peer code reviews and feedback.
- Worked with different eCommerce based insurance applications to fix bugs and add new features.
- Worked with agile methodologies, CI/CD practice, and software tools such as JIRA, Jenkins, GIT, Maven, and popular IDEs.
- Developed microservices using Spring Boot, Rest API, JSON.
 Environment: Java, Spring Boot, Spring, Jira, Postman, MongoDB, Node.Js,
 AWS, Docker, Kubernetes, DynamoDB, RDS.

Infosys
2 years 2 months

System Engineer

June 2016 - February 2018 (1 year 9 months)

Chennai Area, India

- Followed Agile Software Development Methodology in the progress of the project.
- Created Single Page Applications (SPA) using Angular 6, Spring Boot.
- Responsible for designing the appropriate solution by creating the Design Diagrams (Use Case, Sequence, Class Diagrams).
- Created REST APIs using Spring Boot, Microservices and experience with Docker containers.
- Used Git, Bitbucket and SVN to maintain the version control and for the source code repository.
- · Created Wall-Garden sites using Angular.
- Created the initial framework for the development team, that could be used as a base to build the functionality on top of that.
- Developed various reusable helper and utility classes which were used across all modules of the application.
- Created REST services templates using swagger specifications for binding the appropriate data elements to the API.
- Created Web servers using VMWare, Working with Unix language.

Environment: Java, Angular 6, TypeScript, Node.js, JSON, Oracle, Git, Bitbucket, SVN, VMWare

System Engineer Trainee
January 2016 - May 2016 (5 months)
Karnataka, India

Education

University of Windsor

Master of Engineering - MEng, Computer Engineering · (2018 - 2019)

SRM University

Bachelor's degree, Computer Science · (2013 - 2016)

SRM Polytechnic College

High School Diploma, Computer Science · (2010 - 2013)
